

## Precision Engineered Products LLC global medical solutions

When leading companies need a single source they can trust for high-reliability medical applications, they choose Precision Engineered Products.

**World-class expertise.** Together, our eight brands deliver the best solutions for today's most complex medical manufacturing challenges. Our integrated teams comprise decades of innovation in the areas of:

- Surgical assemblies and finished devices
- Plastic injection molding and plastic machining
- Metal forming
- Electrical contacts
- Surface finishing

**What you need, where you need it.** PEP's eleven manufacturing locations in the U.S., Dominican Republic, Mexico and China ensure efficient support of your global operations, at the best value. We provide Class 8 cleanroom manufacturing. Low volume to high volume, with fast turnaround.

**The rigorous quality oversight you expect.** PEP's certifications include ISO 13485 and ISO 9001. PEP has two FDA registered brands, and CE marking on multiple products.

All this, with single-supplier project management and accountability.
